Mental maths homework:

7.3 Halve any 2 digit number
e.g. half 46 = 43
    half 67 = 33.5 or 33 ½
    half 72 = 36
    half 51 = 25.5 or 25 ½

Times Tables Rockstar practise.

We have been working on division and using facts that we know already to help us divide 2 digit numbers:
For example, to work out the calculation $39 \div 3 = ?$
We can share the number using a place value chart

Tens	Ones
●	● ● ●
●	● ● ●
●	● ● ●

And we know:
$3 \times 3 = 9$ and
$3 \times 10 = 30$
So $39 \div 3 = 13$

1) $48 \div 4 =$

Tens	Ones

3) $76 \div 4 =$

Tens	Ones

You will need to do an exchange for the next ones!

2) $51 \div 3 =$

Tens	Ones

4) $72 \div 3 =$

Tens	Ones
